

Exclusive Invitation

# Learning expedition for International CSOs & CTOs

Feb 11 - 12, 2025

The Paris-Saclay Summit - Choose Science was born from the shared ambition of the Paris Region, the Communauté d'Agglomération Paris-Saclay and Le Point magazine to leverage the scientific and technological influence of Paris-Saclay in order to showcase French excellence and the global reach of public and private research.

As key players in the major changes taking place today, economic and industrial players have a crucial role to play at the Paris-Saclay Summit.

This event gives them the opportunity to showcase their commitments and R&D work for a more attractive society.

The Paris-Saclay Summit provides access to French and international scientific and technological excellence, thanks to a high-level program covering all fields.

As partner of Paris Saclay Summit, Choose Paris Region's international attractiveness agency is pleased to extend an exclusive invitation to you, to join our upcoming Learning Expedition at the Paris-Saclay campus, a global hub for innovation and R&D.

This event is designed specifically for Chief Scientific Officers and Chief Technology Officers from leading international companies.

Following the Learning Expedition, we invite you to attend the second edition of the "Paris Saclay Summit - Choose Science", a two-day event packed with exciting conferences and debates around climate, health, AI, innovation, and energy.

This summit is an exceptional opportunity to meet and exchange with the greatest scientists, inventors, Nobel Prize winners, politicians, and business leaders.
